DOSATRON INTERNATIONAL ANNOUNCES NEW WEBSITE LAUNCH

CLEARWATER, Fla, November 12, 2015 – Dosatron International, Inc. has launched a new version of their website at www.dosatronusa.com. The relaunch has a completely new look, new features, and is now compatible with handheld devices.

“Updating the Dosatron website design, with the intention of making it easier to access products and making it mobile friendly, has been a goal over the past year,” explains Pam Temko, Dosatron’s CEO. “We believe that the redesign will be easier for our customers to navigate. We also added a *See How It Works* page which can be accessed directly from the home page banner for those who are not familiar with Dosatron. It provides an overview along with information on how to select the correct Dosatron for a specific application.”

One of the three main features of the website is the new Chat option. Chat allows customers to have instant access to our customer service representatives who can answer questions or help with maintenance.

The second exciting new feature is the ability for the website to work easily with mobile phones and tablets. When a customer is in the field and they have a support question, they can easily view the Support page on the website without having to go back to the office.

The third feature we are very proud of is our Video Library that is always expanding. The website provides service and maintenance videos under the Product pages for specific Dosatron injectors.

For more information about the new website design, as well as navigation help, contact Dosatron International’s world-class customer service department at 800-523-8499, or try out the new Chat feature.

About Dosatron International

Dosatron International, Inc. is an industry leader in water-powered, proportional chemical injectors. Dosatron products are manufactured according to ISO 9001:2000 and ISO 14001:2004.
